UID EX 10

240701198 **JAI AAKASH S**

AIM:

The aim is to create interactive data visualizations, such as bar charts and doughnut charts, for a Monthly sales analysis system using JavaScript.

PROCEDURE:

Step 1:
Set up the HTML file to create the basic structure of the webpage. Include a canvas element to display the charts.
Step 2:
Add required libraries (like Chart.js) using CDN in the HTML file.
Step 3:
Create a JavaScript file (script.js) to store the the electrical gagets like mobiles,laptop.
Step 4:
Use JavaScript to generate a **bar chart** showing monthly sales progression.
Step 5:
Create a **doughnut chart** to represent month-wise gagets distribution.
Step 6:
Link the JavaScript file to the HTML file and run the program in a browser.

Code:

index.html

```html
<!DOCTYPE html>
<html>
<head>
    <title>Sales Dashboard</title>
    <script src="https://cdn.jsdelivr.net/npm/chart.js"></script>
    <style>
        body {
            font-family: Arial;
            text-align: center;
            background-color: #f4f4f4;
        }

        .container {
            width: 80%;
            margin: auto;
        }

        canvas {
            margin: 30px;
            background: white;
            padding: 15px;
            border-radius: 10px;
            box-shadow: 0px 0px 10px gray;
        }
    </style>
</head>
```

index.html

index.html > html

```html
<html>

<body>

<h2>Sales Analysis Dashboard</h2>

<div class="container">
    <canvas id="barChart"></canvas>
    <canvas id="pieChart"></canvas>
</div>

<script>
    // Data
    const months = ["Jan", "Feb", "Mar", "Apr", "May"];
    const sales = [12000, 19000, 15000, 22000, 18000];

    const products = ["Laptop", "Mobile", "Tablet", "Accessories"];
    const productSales = [40, 30, 20, 10];

    // Bar Chart
    new Chart(document.getElementById("barChart"), {
        type: "bar",
        data: {
            labels: months,
            datasets: [{
                label: "Monthly Sales",
                data: sales,
